IN PARTNERSHIP WITH

MERISTEM
CROP PERFORMANCE GROUP, LLC

PLAN. PERFORM. PROFIT.

PERFORMANCE ANALYSIS GROUP

ROI STANDS ON IT'S OWN. BUT YOU NEED DATA TO PROVE IT.

Record Harvest – in partnership with **Meristem Crop Performance™** – has created PAG (the Performance Analysis Group). PAG offers growers, like you, a transparent, data-powered system for evaluating the true performance of your crop inputs by acre, field and farm from a return on investment (ROI) perspective.

MEASUREMENT MATTERS

You can't measure what you don't know. That's why Record Harvest's PAG program relies on quality, real-time agronomic and machine data – powered by Farmobile® data collection technology – to track results from planting through harvest.

- Place a \$10k minimum order of two or more Meristem products and receive a **\$625.00 REBATE** for the first year of a Farmobile data subscription. (Farmobile data subscriptions are 3-year).
- Participants will receive a Farmobile data subscription credit voucher upon payment.
- Contact your RH sales rep for details.

ACCESS MERISTEM'S HIGH PERFORMERS

Meristem Crop Performance gives you control and purchasing power for input essentials and high-performance products – at a fraction of the cost. The portfolio includes crop input additives widely used and trusted by corn, soybean, wheat, sugar beet and cotton growers.

- **Seed treatments**
- **Plant growth regulators**
- **Nitrogen stabilizers**
- **Micronutrients & foliar nutritionals**
- **Drift + deposition, water conditioners and surfactants**
- **Tank cleaners, antifoaming + defoaming agents**
- **Diesel exhaust fluid + other functional fluids**
